8/13/2014

To Whom It May Concern:

We have been asked to assist the Myakka Valley Ranches Homeowners Association in getting 9 census block changed from served to unserved under the Connect America Phase II Challenge Process. We have filled out FCC Form 505 and are attaching this document as evidence that the census blocks need to be changed to unserved and be available for CAF II and Rural Broadband Experimental funds. The census blocks in question are: 121150027131021, 121150027131023, 121150027131026, 121150027131040, 121150027131041, 121150027131042, 121150027131043, 121150027131044, and 121150027133018.

In summary, this is an established rural community in Sarasota county Florida. Comcast reports service coverage in this community; however their closest service area is at least 5 miles from the entrance of the community. Comcast has repeatedly told residents in the community that it is too expensive to build out. The cellular options (Verizon/AT&T/T-Mobile) are usually only offering 3G in this densely treed community. When 4G speeds are available, the low usage limits prevent the residents from using the service for anything productive. Myakka Communications is listed as a provider of wireless service, but this is due to an error with the state mapping department. Myakka Communications does not offer wireless service (please see our 477 filings). However, our sister company Myakka Technologies does offer wireless, but we do not cover Myakka Valley Ranches due to the heavy tree cover. In addition Myakka Technologies does not offer phone service or 100GB plans on the wireless network.

The majority of the residents are forced to use the subpar DSL supplied by Verizon. Verizon only offers a 3mbps download maximum. We recognize the commission's position on the 3/1 vs 4/1 rule, but argue Verizon can barely even deliver the 3mbps down they sell.

The following pages of this document will show our detailed analysis of the area including speed tests submitted by residents and an overview of the community.

As per the commission's requirement, notification letters have been sent to the regulatory departments of Comcast, Verizon, T-Mobile and AT&T.

Thank You,

Mark Ackaway

Myakka Valley Ranches is uniquely situated adjacent to the 28,875 acre [Myakka River State Park](#), an oasis of natural Florida vegetation. The park contains miles of hiking trails, two lakes, and a wild & scenic river. It is not uncommon to see native wildlife species: gopher tortoises, alligators, armadillos, fox, deer, otter, and even an occasional bald eagle.

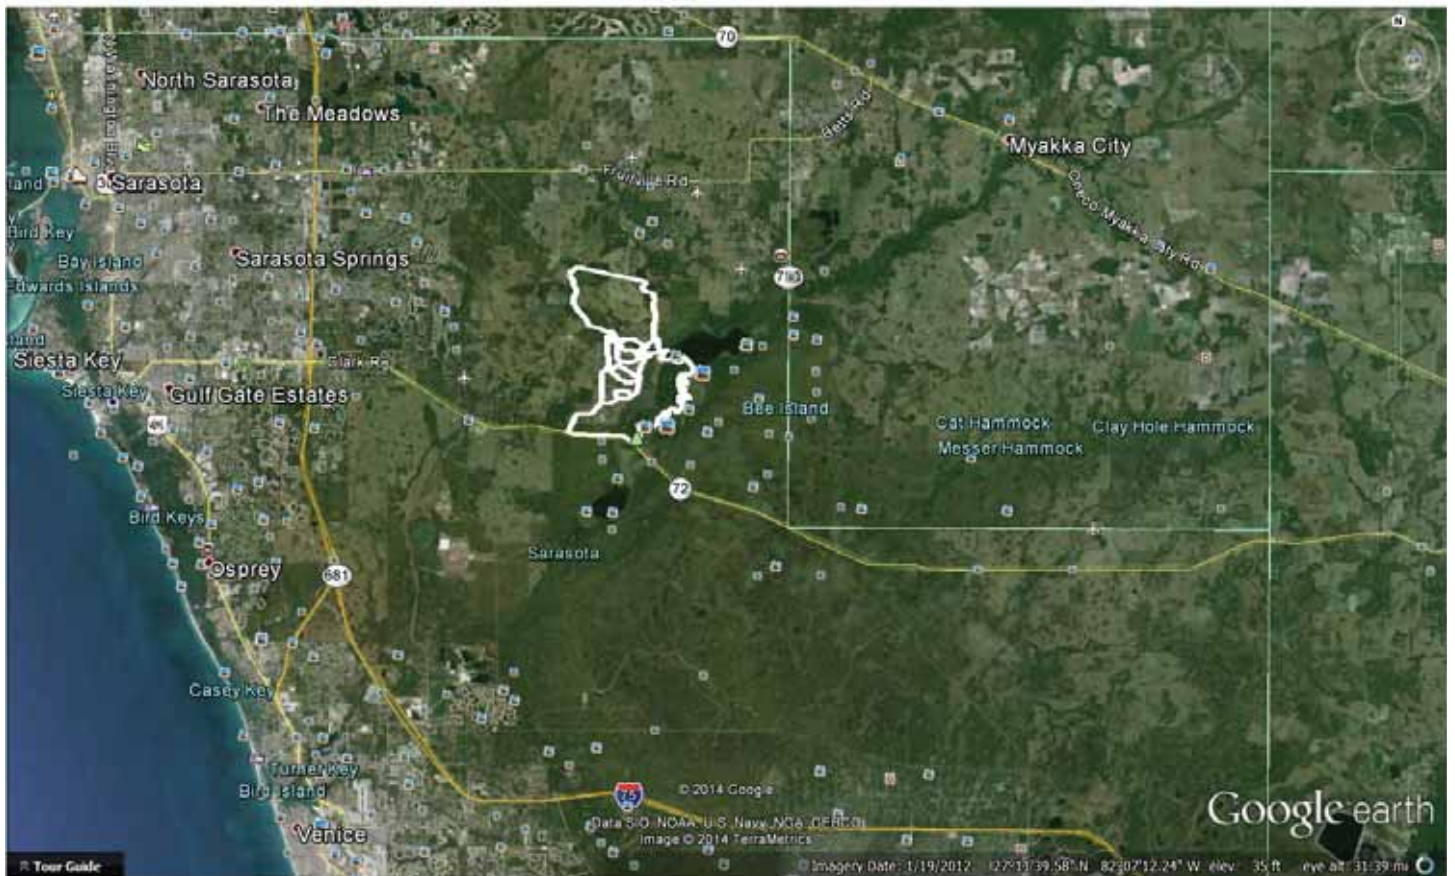

Myakka Valley Ranches offers a way of life all it's own. The subdivision is comprised of approximately three hundred 5+ acre parcels, with privately owned and maintained paved roads. The area is designed to accommodate horses, with easements on both sides of the 17 miles of paved roads designated as riding trails as well as several miles of other trails. The road system design provides for low traffic and creates an ideal setting for bike riding and jogging. Two private waterfront parks are located within the subdivision for resident's use.

The [Sarasota County](#) fire station pictured at left is conveniently located at the entrance of the subdivision.

Myakka Valley Ranches Improvement Association (MVRJA, hence the Website name) is responsible for road and bridge maintenance and enforcement of the deed restrictions. The MVRJA annual dues are only \$471.90 per year. The MVRJA Board of Directors conduct monthly meetings which are open to all Homeowners, and the Annual meeting/barbeque is held in April. The MVRJA also publishes the "Trails 'N' Tales", a monthly newsletter containing local news items, a calendar of events, local classified ads, and other information for residents.

Myakka Valley Ranches Improvement Association, Inc.

PO Box 21463

Sarasota, Florida 34276

To whom it may concern,

My name is Frank DiCicco, and I am writing you as the President of the Myakka Valley Ranches Homeowner's Association. My request is to get our subdivision's Internet designation changed from a served, to a non-served area so we would qualify for your new Internet program.

I have been told that your records show that the area is served by numerous Internet suppliers including AT&T, Comcast, and Verizon. This is not the case. We have a very slow DSL supplied by Verizon. The fastest download speed we can get on this DSL is less than 3 mbps, with upload speeds not exceeding 500 kbps. During busy times of the day, it drops to kbps and is almost impossible to download even a 3 Megabyte file or upload a 1 Megabyte file. I don't think that qualifies for broadband anymore. AT&T and Comcast have no cable, phone, or fiber lines in the subdivision, much less broadband Internet service. A few of the speed tests that our homeowners have run are attached for your review.

Our subdivision is a rural subdivision, with about 200 homes, outside the city of Sarasota, Florida. We have been forgotten by the large telephone and cable companies. Under the new experimental program you are about to offer, it is our hope that with your help, an outside independent provider will be able to bring this vital service to our area. As long as it is misclassified as "served", we will never get true broadband in the area. Please help us.

Thank you for your consideration of our request,

Frank DiCicco

MVRIA President

August 13, 2014

I just got forwarded this email. I work from home and was not aware high speed internet was not offered when we bought our house more than 4 years ago. I tried contacting Verizon about upgrading their lines at that time, and they said to drop down the new infrastructure would cost too much money.

Anyway, I just ran the speed test and results are:

ping: 51ms
Downlaod Speed: 2.50 Mbps
Upload Speed: 0.69 Mbps

I would be happy to help in any way I can to get a faster internet connection.
:)

Subject: High Speed Internet in Myakka Valley Ranches
To:

Hello, I saw a post by Amy Chenard in regards to bringing high speed internet to the valley. I'm in the back corner of the valley, and with Verizon DSL as the only real option, it's quite painful to try to get business done through. I'm very much interested in seeing what we can do about getting FiOS or even xfinity out here. At my previous residence, I had "75 down/50 up" FiOS, where I could reliably get an actual 6 Mbp/s any time of the day, and could hit over 20 on an inflated speedtest

<http://www.speedtest.net/result/3683434781.png>

<http://www.speedtest.net/result/3683455844.png>

<http://www.speedtest.net/result/3683459705.png>

Please let me know if there's any way I can help expedite the process. Now, this is the best I can get, even this late at night. Notice how even a local server isn't noticeably better. My phone's 4G has gotten over 1.6 on the same test.

To:

Mark,

I have the results. But you should me by now - to just say "save as an image and email it", without additional instructions ensures, for me at least ,it won't be emailed back to you. Sorry about that but all I got was the entire web site downloaded, without my speed test on it.

10 - 25 Mbps

Myakka Communications, Inc.

6 - 10 Mbps

Comcast Wired – Comcast does NOT have any facilities in this census block. Please see Exhibit A for the results of the address search. Therefore, we claim Comcast does NOT meet any of the requirements to declare this census block served..

Verizon Wired – Verizon only offers DSL at a maximum of 3/1 mbps (Exhibit B). We understand the committee was allowing 3/1 mbps with the assumption that the provider could deliver 4/1mbps service. Verizon plainly only offers the 3/1 mbps and per our test results, they do not even deliver those speeds. Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 4/1 speed requirement.

Verizon Wireless LTE Home Service – Verizon claims its LTE home service is available in this area. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 30GB package (Exhibit C). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 100GB requirement.

AT&T Wireless – AT&T claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 50GB package (Exhibit D). Therefore, we claim Verizon Wireless does NOT meet the requirements to declare this census block served as per the 100GB requirement.

Myakka Communications Wireless – Myakka Communications does not do any wireless service, please see our 477 filings to confirm this. Myakka Technologies does offer wireless service. We are currently working with our state mapping representatives to correct the errors on the next update. Myakka Technologies does not offer packages over 25GB and does not offer phone service. Therefore, we claim Myakka Technologies does NOT meet the requirements to declare this census block served as per the 100GB requirement and the voice requirement.

In conclusion, based on the above analysis, we ask the commission to reclassify census block 121150027131021 from served to unserved and make it available for CAF II and the Rural Broadband Experiment programs.

High Speed Internet delivered to your home wirelessly.

LTE Internet (Installed) is a residential Internet solution that uses Verizon's 4G LTE network to bring reliable, high-speed Internet service to customers with limited broadband options.

- Fast Internet access with average speeds of 5 - 12 Mbps download and 2 - 5 Mbps upload
- Wi-Fi connectivity for up to 20 devices
- Wired (Ethernet) connectivity for up to 4 devices
- Up to 5 email accounts included
- Installation included and no activation fee
- Installation takes two hours on average

LTE Internet (Installed) Plans

Monthly Data Allowance	Monthly Access
10GB	\$60
20GB	\$90
30GB	\$120

Or add LTE Internet (Installed) to your existing MORE Everything Plan with 10 GB of data or more for only \$20/month

[Get More](#)

[Help Me Calculate My Data Usage](#)

New customers to the service will receive 50% more data allowance for their first 2 full billing cycles. Requires new 2-year activation. Overage is billed at \$10 for each additional 1GB. 50% more data not available on MORE Everything plan.

Protection Plan

Get peace of mind with a LTE Internet (Installed) Protection Plan. For only \$6.99/month, protection plans cover:

- Repair or replacement of LTE Internet (Installed) equipment after the manufacturer's warranty due to mechanical or electric failure of the product.
- Onsite service and labor costs.

Enrollments open for 30 days after service is activated.

Step 1: Choose an AT&T Mobile Share - Data plan

Shared data	4GB	6GB	10GB	15GB	20GB	30GB	40GB	50GB
Monthly cost	\$30	\$40	\$60	\$90	\$110	\$185	\$260	\$335

Step 2: Add other devices to your Mobile Share Value plan

Tablets & gaming devices	Laptops, LaptopConnect, mobile hotspot devices, and netbooks
Shared data	Shared data
\$10 each per month	\$20 each per month

Mobile Share Value Pricing: Prices include monthly plan charge and monthly access charge per device. AT&T NextSM installment charges extra. Devices sold separately. For plans 10GB or higher, customers with smartphones on 2-yr agreements prior to 2/2/14 are eligible for the \$15/mo. access charge. For plans 2GB to 6GB, customers with smartphones on 2-yr agreements prior to 3/9/14 are eligible for the \$25/mo. access charge. This discounted pricing is avail. as long as you keep your phone. If upgrading to a new phone the discount is only avail. via AT&T NextSM or when you bring your own phone or buy a new phone at full price. If you upgrade to a new 2-yr agmt the discount is lost. **Data:** If you exceed the amount of data in your plan during your billing period, an additional 300MB, 500MB, or 1GB is automatically provided as specified in your rate plan. Data allowances, including overages, must be used in billing period provided or will be forfeited. Tethering and mobile hotspot use is allowed for up to 5 simultaneous devices. **Device Limits:** 10 per plan for consumers and IRUs. Limit 4 financed devices per wireless account may apply. **Gen. Wireless Svc Terms: Subject to Wireless Customer Agmt or applicable Business Agmt.** Activation/upgrade fee per line & deposit may apply. Credit approval may be req'd. Coverage & svc not avail everywhere. Other restr's apply & may result in svc termination. **Other Monthly Charges:** Apply per line and may include taxes, federal/state universal service charges, a Regulatory Cost Recovery Charge (up to \$1.25), a gross receipts surcharge, an Administrative Fee, and other government assessments which are not government-required charges, including without limitation a Property Tax Allotment surcharge of \$0.20-\$0.45 per CRU's assigned number. Monthly access charge per device may not be eligible for discounts. Pricing subject to change.

¹ **Reliability:** claim based on analysis of independent third party data re nationwide carriers' 4G LTE. LTE is a trademark of ETSI. 4G LTE not available everywhere.

² **Unlimited Talk & Text:** For phones only. Includes unlimited domestic calls & messaging. **Unlimited International Messaging:** Includes unlimited messaging from the U.S., Puerto Rico and the U.S. Virgin Islands to more than 190 countries for text messages and 120 countries for picture & video messages. Messaging capabilities vary by country. AT&T may change countries at its discretion. Visit att.com/text2world (<http://att.com/text2world>) for details. **Messaging:** Messaging applies only to AT&T's Short Messaging Service (SMS) and Multimedia Messaging Service (MMS) and not to any other messaging services or applications. Messages are for direct communication between phones and must originate from your phone. Messages sent to tablets, laptops, or other connected devices are excluded. Messages sent through applications may incur data charges. Service may be terminated or restricted for tethered messaging or misuse.

³ **AT&T Locker:** Requires compatible device (AndroidTM smartphones with OS 2.2+, Android tablets 8" + with 4.0+, iPads[®] and iPhones[®] running iOS 6.0+, smartphones with Windows Phone[®] 8 OS, or a computer with Internet). Service for U.S.-based AT&T subscribers only. Wireless usage may incur data charges. Free storage amounts subject to change or may be discontinued at any time. For full terms, see att.com/wirelesslegal (<http://www.att.com/wirelesslegal>).

⁴ **Wireless Home Phone ("WHP")** is a Commercial Mobile Radio Service and includes unlimited nationwide calling. Provides voice service only, data and messaging excluded. For emergency calls, you may have to provide your address to the 911 operators. WHP device has a backup battery in case of outage. However, landline phone requiring separate electric power connected to WHP device will not place or receive calls (including 911) during power outage. Compatibility limitations apply. For more details go to att.com/getwirelesshomephone (<http://att.com/getwirelesshomephone>).

⁵ **AT&T World Connect Value[™] Package:** Rates are subject to change at any time. \$0.01/minute rate applies to calls to wireless and wireline numbers made to the selected countries identified at att.com/worldconnect (<http://att.com/worldconnect>). AT&T reserves the right to terminate your AT&T World Connect Value Package for excessive usage, and then current international long distance pay-per-use rates will apply to calls you make to those countries. Calls to special services, such as Premium Rated Services, may cost more. Other restrictions and limitations apply. For complete details visit att.com/worldconnect (<http://att.com/worldconnect>).

⁶ Pricing for Value plan with 10GB data includes plan charge (\$100/mo.) and \$15/mo. access charge per smartphone on no annual service contract (AT&T Next, bring your own device, pay full price, or month-to-month). AT&T Next installment charges extra. Also applies to customers with smartphones on 2-yr agreements prior to 2/2/14. When upgrading, buy via AT&T Next or at full price to keep discount. Other charges and restrictions apply.

General Wireless Service Terms: Subject to Wireless Customer Agreement or applicable Business Agreement. Activation fee \$40 per line may apply. Early termination fee up to \$325 may apply. Credit approval required. Geographic, usage, and other terms, conditions, and restrictions apply, and may result in service termination. Coverage and services not avail everywhere. Taxes and other monthly charges apply.

Comcast Wired – Comcast does NOT have any facilities in this census block. Please see Exhibit A for the results of the address search. Therefore, we claim Comcast does NOT meet any of the requirements to declare this census block served.

Verizon Wired – Verizon only offers DSL at a maximum of 3/1 mbps (Exhibit B). We understand the committee was allowing 3/1 mbps with the assumption that the provider could deliver 4/1mbps service. Verizon plainly only offers the 3/1 mbps and per our test results, they do not even deliver those speeds. Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 4/1 speed requirement.

Verizon Wireless LTE Home Service – Verizon claims its LTE home service is available in this area. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 30GB package (Exhibit C). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 100GB requirement.

AT&T Wireless – AT&T claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 50GB package (Exhibit D). Therefore, we claim Verizon Wireless does NOT meet the requirements to declare this census block served as per the 100GB requirement.

Myakka Communications Wireless – Myakka Communications does not do any wireless service, please see our 477 filings to confirm this. Myakka Technologies does offer wireless service. We are currently working with our state mapping representatives to correct the errors on the next update. Myakka Technologies does not offer packages over 25GB and does not offer phone service. Therefore, we claim Myakka Technologies does NOT meet the requirements to declare this census block served as per the 100GB requirement and the voice requirement.

In conclusion, based on the above analysis, we ask the commission to reclassify census block 121150027131023 from served to unserved and make it available for CAF II and the Rural Broadband Experiment programs.

Verizon Wi-Fi available with select FiOS and High Speed Internet packages and in designated locations only. The service requires Windows 7, Windows Vista or Windows XP 32-bit with Service Pack. Not available for Macintosh or Windows XP 64-bit operating systems. Visit [verizon.com/wifi](#) for additional information and availability.

Prices shown reflect \$5 monthly discount offer available to Verizon customers who order a new bundle with Regional Essentials, Freedom Essentials, or FiOS Digital Voice – Unlimited, plus qualifying internet and/or TV. Also available to customers ordering just Freedom Essentials online or adding new data and/or TV to existing Freedom Essentials or FiOS Digital Voice – Unlimited. Cannot be combined with other discounts or promotions unless specified. \$5 discount applied as a credit on the customer's Verizon bill. Additional charges, taxes and other terms apply. \$5/month discount via bill credit for customers ordering online will commence after service activation and will continue for 24 consecutive months. Product and/or bundle rates subject to change after 12 months.

High Speed Internet delivered to your home wirelessly.

LTE Internet (Installed) is a residential Internet solution that uses Verizon's 4G LTE network to bring reliable, high-speed Internet service to customers with limited broadband options.

- Fast Internet access with average speeds of 5 - 12 Mbps download and 2 - 5 Mbps upload
- Wi-Fi connectivity for up to 20 devices
- Wired (Ethernet) connectivity for up to 4 devices
- Up to 5 email accounts included
- Installation included and no activation fee
- Installation takes two hours on average

LTE Internet (Installed) Plans

Monthly Data Allowance	Monthly Access
10GB	\$60
20GB	\$90
30GB	\$120

Or add LTE Internet (Installed) to your existing MORE Everything Plan with 10 GB of data or more for only \$20/month

[Get More](#)

[Help Me Calculate My Data Usage](#)

New customers to the service will receive 50% more data allowance for their first 2 full billing cycles. Requires new 2-year activation. Overage is billed at \$10 for each additional 1GB. 50% more data not available on MORE Everything plan.

Protection Plan

Get peace of mind with a LTE Internet (Installed) Protection Plan. For only \$6.99/month, protection plans cover:

- Repair or replacement of LTE Internet (Installed) equipment after the manufacturer's warranty due to mechanical or electric failure of the product.
- Onsite service and labor costs.

Enrollments open for 30 days after service is activated.

 - [FAQs](#)

Step 1: Choose an AT&T Mobile Share - Data plan

Shared data	4GB	6GB	10GB	15GB	20GB	30GB	40GB	50GB
Monthly cost	\$30	\$40	\$60	\$90	\$110	\$185	\$260	\$335

Step 2: Add other devices to your Mobile Share Value plan

Tablets & gaming devices	Laptops, LaptopConnect, mobile hotspot devices, and netbooks
Shared data	Shared data
\$10 each per month	\$20 each per month

Mobile Share Value Pricing: Prices include monthly plan charge and monthly access charge per device. AT&T NextSM installment charges extra. Devices sold separately. For plans 10GB or higher, customers with smartphones on 2-yr agreements prior to 2/2/14 are eligible for the \$15/mo. access charge. For plans 2GB to 6GB, customers with smartphones on 2-yr agreements prior to 3/9/14 are eligible for the \$25/mo. access charge. This discounted pricing is avail. as long as you keep your phone. If upgrading to a new phone the discount is only avail. via AT&T NextSM or when you bring your own phone or buy a new phone at full price. If you upgrade to a new 2-yr agmt the discount is lost. **Data:** If you exceed the amount of data in your plan during your billing period, an additional 300MB, 500MB, or 1GB is automatically provided as specified in your rate plan. Data allowances, including overages, must be used in billing period provided or will be forfeited. Tethering and mobile hotspot use is allowed for up to 5 simultaneous devices. **Device Limits:** 10 per plan for consumers and IRUs. Limit 4 financed devices per wireless account may apply. **Gen. Wireless Svc Terms: Subject to Wireless Customer Agmt or applicable Business Agmt.** Activation/upgrade fee per line & deposit may apply. Credit approval may be req'd. Coverage & svc not avail everywhere. Other restr's apply & may result in svc termination. **Other Monthly Charges:** Apply per line and may include taxes, federal/state universal service charges, a Regulatory Cost Recovery Charge (up to \$1.25), a gross receipts surcharge, an Administrative Fee, and other government assessments which are not government-required charges, including without limitation a Property Tax Allotment surcharge of \$0.20-\$0.45 per CRU's assigned number. Monthly access charge per device may not be eligible for discounts. Pricing subject to change.

¹ **Reliability:** claim based on analysis of independent third party data re nationwide carriers' 4G LTE. LTE is a trademark of ETSI. 4G LTE not available everywhere.

² **Unlimited Talk & Text:** For phones only. Includes unlimited domestic calls & messaging. **Unlimited International Messaging:** Includes unlimited messaging from the U.S., Puerto Rico and the U.S. Virgin Islands to more than 190 countries for text messages and 120 countries for picture & video messages. Messaging capabilities vary by country. AT&T may change countries at its discretion. Visit att.com/text2world (<http://att.com/text2world>) for details. **Messaging:** Messaging applies only to AT&T's Short Messaging Service (SMS) and Multimedia Messaging Service (MMS) and not to any other messaging services or applications. Messages are for direct communication between phones and must originate from your phone. Messages sent to tablets, laptops, or other connected devices are excluded. Messages sent through applications may incur data charges. Service may be terminated or restricted for tethered messaging or misuse.

³ **AT&T Locker:** Requires compatible device (AndroidTM smartphones with OS 2.2+, Android tablets 8" + with 4.0+, iPads[®] and iPhones[®] running iOS 6.0+, smartphones with Windows Phone[®] 8 OS, or a computer with Internet). Service for U.S.-based AT&T subscribers only. Wireless usage may incur data charges. Free storage amounts subject to change or may be discontinued at any time. For full terms, see att.com/wirelesslegal (<http://www.att.com/wirelesslegal>).

⁴ **Wireless Home Phone ("WHP")** is a Commercial Mobile Radio Service and includes unlimited nationwide calling. Provides voice service only, data and messaging excluded. For emergency calls, you may have to provide your address to the 911 operators. WHP device has a backup battery in case of outage. However, landline phone requiring separate electric power connected to WHP device will not place or receive calls (including 911) during power outage. Compatibility limitations apply. For more details go to att.com/getwirelesshomephone (<http://att.com/getwirelesshomephone>).

⁵ **AT&T World Connect Value[™] Package:** Rates are subject to change at any time. \$0.01/minute rate applies to calls to wireless and wireline numbers made to the selected countries identified at att.com/worldconnect (<http://att.com/worldconnect>). AT&T reserves the right to terminate your AT&T World Connect Value Package for excessive usage, and then current international long distance pay-per-use rates will apply to calls you make to those countries. Calls to special services, such as Premium Rated Services, may cost more. Other restrictions and limitations apply. For complete details visit att.com/worldconnect (<http://att.com/worldconnect>).

⁶ Pricing for Value plan with 10GB data includes plan charge (\$100/mo.) and \$15/mo. access charge per smartphone on no annual service contract (AT&T Next, bring your own device, pay full price, or month-to-month). AT&T Next installment charges extra. Also applies to customers with smartphones on 2-yr agreements prior to 2/2/14. When upgrading, buy via AT&T Next or at full price to keep discount. Other charges and restrictions apply.

General Wireless Service Terms: Subject to Wireless Customer Agreement or applicable Business Agreement. Activation fee \$40 per line may apply. Early termination fee up to \$325 may apply. Credit approval required. Geographic, usage, and other terms, conditions, and restrictions apply, and may result in service termination. Coverage and services not avail everywhere. Taxes and other monthly charges apply.

Comcast Wired – Comcast does NOT have any facilities in this census block. Please see Exhibit A for the results of the address search. Therefore, we claim Comcast does NOT meet any of the requirements to declare this census block served.

Verizon Wired – Verizon only offers DSL at a maximum of 3/1 mbps (Exhibit B). We understand the committee was allowing 3/1 mbps with the assumption that the provider could deliver 4/1mbps service. Verizon plainly only offers the 3/1 mbps and per our test results, they do not even deliver those speeds. Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 4/1 speed requirement.

Verizon Wireless LTE Home Service – Verizon claims its LTE home service is available in this area. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 30GB package (Exhibit C). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 100GB requirement.

AT&T Wireless – AT&T claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 50GB package (Exhibit D). Therefore, we claim Verizon Wireless does NOT meet the requirements to declare this census block served as per the 100GB requirement.

Myakka Communications Wireless – Myakka Communications does not do any wireless service, please see our 477 filings to confirm this. Myakka Technologies does offer wireless service. We are currently working with our state mapping representatives to correct the errors on the next update. Myakka Technologies does not offer packages over 25GB and does not offer phone service. Therefore, we claim Myakka Technologies does NOT meet the requirements to declare this census block served as per the 100GB requirement and the voice requirement.

In conclusion, based on the above analysis, we ask the commission to reclassify census block 121150027131040 from served to unserved and make it available for CAF II and the Rural Broadband Experiment programs.

Verizon Wi-Fi available with select FiOS and High Speed Internet packages and in designated locations only. The service requires Windows 7, Windows Vista or Windows XP 32-bit with Service Pack. Not available for Macintosh or Windows XP 64-bit operating systems. Visit [verizon.com/wifi](#) for additional information and availability.

Prices shown reflect \$5 monthly discount offer available to Verizon customers who order a new bundle with Regional Essentials, Freedom Essentials, or FiOS Digital Voice – Unlimited, plus qualifying internet and/or TV. Also available to customers ordering just Freedom Essentials online or adding new data and/or TV to existing Freedom Essentials or FiOS Digital Voice – Unlimited. Cannot be combined with other discounts or promotions unless specified. \$5 discount applied as a credit on the customer's Verizon bill. Additional charges, taxes and other terms apply. \$5/month discount via bill credit for customers ordering online will commence after service activation and will continue for 24 consecutive months. Product and/or bundle rates subject to change after 12 months.

High Speed Internet delivered to your home wirelessly.

LTE Internet (Installed) is a residential Internet solution that uses Verizon's 4G LTE network to bring reliable, high-speed Internet service to customers with limited broadband options.

- Fast Internet access with average speeds of 5 - 12 Mbps download and 2 - 5 Mbps upload
- Wi-Fi connectivity for up to 20 devices
- Wired (Ethernet) connectivity for up to 4 devices
- Up to 5 email accounts included
- Installation included and no activation fee
- Installation takes two hours on average

LTE Internet (Installed) Plans

Monthly Data Allowance	Monthly Access
10GB	\$60
20GB	\$90
30GB	\$120

Or add LTE Internet (Installed) to your existing MORE Everything Plan with 10 GB of data or more for only \$20/month

Monthly access charge per device may not be eligible for discounts. Pricing subject to change.

¹ **Reliability:** claim based on analysis of independent third party data re nationwide carriers' 4G LTE. LTE is a trademark of ETSI. 4G LTE not available everywhere.

² **Unlimited Talk & Text:** For phones only. Includes unlimited domestic calls & messaging. **Unlimited International Messaging:** Includes unlimited messaging from the U.S., Puerto Rico and the U.S. Virgin Islands to more than 190 countries for text messages and 120 countries for picture & video messages. Messaging capabilities vary by country. AT&T may change countries at its discretion. Visit att.com/text2world (<http://att.com/text2world>) for details. **Messaging:** Messaging applies only to AT&T's Short Messaging Service (SMS) and Multimedia Messaging Service (MMS) and not to any other messaging services or applications. Messages are for direct communication between phones and must originate from your phone. Messages sent to tablets, laptops, or other connected devices are excluded. Messages sent through applications may incur data charges. Service may be terminated or restricted for tethered messaging or misuse.

³ **AT&T Locker:** Requires compatible device (AndroidTM smartphones with OS 2.2+, Android tablets 8" + with 4.0+, iPads[®] and iPhones[®] running iOS 6.0+, smartphones with Windows Phone[®] 8 OS, or a computer with Internet). Service for U.S.-based AT&T subscribers only. Wireless usage may incur data charges. Free storage amounts subject to change or may be discontinued at any time. For full terms, see att.com/wirelesslegal (<http://www.att.com/wirelesslegal>).

⁴ **Wireless Home Phone ("WHP")** is a Commercial Mobile Radio Service and includes unlimited nationwide calling. Provides voice service only, data and messaging excluded. For emergency calls, you may have to provide your address to the 911 operators. WHP device has a backup battery in case of outage. However, landline phone requiring separate electric power connected to WHP device will not place or receive calls (including 911) during power outage. Compatibility limitations apply. For more details go to att.com/getwirelesshomephone (<http://att.com/getwirelesshomephone>).

⁵ **AT&T World Connect Value[™] Package:** Rates are subject to change at any time. \$0.01/minute rate applies to calls to wireless and wireline numbers made to the selected countries identified at att.com/worldconnect (<http://att.com/worldconnect>). AT&T reserves the right to terminate your AT&T World Connect Value Package for excessive usage, and then current international long distance pay-per-use rates will apply to calls you make to those countries. Calls to special services, such as Premium Rated Services, may cost more. Other restrictions and limitations apply. For complete details visit att.com/worldconnect (<http://att.com/worldconnect>).

⁶ Pricing for Value plan with 10GB data includes plan charge (\$100/mo.) and \$15/mo. access charge per smartphone on no annual service contract (AT&T Next, bring your own device, pay full price, or month-to-month). AT&T Next installment charges extra. Also applies to customers with smartphones on 2-yr agreements prior to 2/2/14. When upgrading, buy via AT&T Next or at full price to keep discount. Other charges and restrictions apply.

General Wireless Service Terms: Subject to Wireless Customer Agreement or applicable Business Agreement. Activation fee \$40 per line may apply. Early termination fee up to \$325 may apply. Credit approval required. Geographic, usage, and other terms, conditions, and restrictions apply, and may result in service termination. Coverage and services not avail everywhere. Taxes and other monthly charges apply.

Verizon Communications Inc.

10 - 25 Mbps

AT&T Inc.

10 - 25 Mbps

T-Mobile

10 - 25 Mbps

Myakka Communications, Inc.

6 - 10 Mbps

Verizon Wired – Verizon only offers DSL at a maximum of 3/1 mbps (Exhibit A). We understand the committee was allowing 3/1 mbps with the assumption that the provider could deliver 4/1mbps service. Verizon plainly only offers the 3/1 mbps and per our test results, they do not even deliver those speeds. Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 4/1 speed requirement.

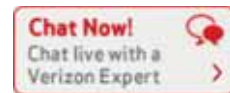

Verizon Wireless LTE Home Service – Verizon claims its LTE home service is available in this area. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 30GB package (Exhibit B). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 100GB requirement.

AT&T Wireless – AT&T claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 50GB package (Exhibit C). Therefore, we claim Verizon Wireless does NOT meet the requirements to declare this census block served as per the 100GB requirement.

T-Mobile – T-Mobile claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 11GB package (Exhibit D). Therefore, we claim T-Mobile does NOT meet the requirements to declare this census block served as per the 100GB requirement.

Myakka Communications Wireless – Myakka Communications does not do any wireless service, please see our 477 filings to confirm this. Myakka Technologies does offer wireless service. We are currently working with our state mapping representatives to correct the errors on the next update. Myakka Technologies does not offer packages over 25GB and does not offer phone service. Therefore, we claim Myakka Technologies does NOT meet the requirements to declare this census block served as per the 100GB requirement and the voice requirement.

In conclusion, based on the above analysis, we ask the commission to reclassify census block 121150027131042 from served to unserved and make it available for CAF II and the Rural Broadband Experiment programs.

Comcast Wired – Comcast does NOT have any facilities in this census block. Please see Exhibit A for the results of the address search. Therefore, we claim Comcast does NOT meet any of the requirements to declare this census block served.

Verizon Wired – Verizon only offers DSL at a maximum of 1/1 mbps (Exhibit B). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 4/1 speed requirement.

Verizon Wireless LTE Home Service – Verizon claims its LTE home service is available in this area. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 30GB package (Exhibit C). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 100GB requirement.

AT&T Wireless – AT&T claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 50GB package (Exhibit D). Therefore, we claim Verizon Wireless does NOT meet the requirements to declare this census block served as per the 100GB requirement.

In conclusion, based on the above analysis, we ask the commission to reclassify census block 121150027131043 from served to unserved and make it available for CAF II and the Rural Broadband Experiment programs.

Wireless Svc Terms: Subject to Wireless Customer Agmt or applicable Business Agmt.** Activation/upgrade fee per line & deposit may apply. Credit approval may be req'd. Coverage & svc not avail everywhere. Other restr's apply & may result in svc termination. **Other Monthly Charges:** Apply per line and may include taxes, federal/state universal service charges, a Regulatory Cost Recovery Charge (up to \$1.25), a gross receipts surcharge, an Administrative Fee, and other government assessments which are not government-required charges, including without limitation a Property Tax Allotment surcharge of \$0.20-\$0.45 per CRU's assigned number. Monthly access charge per device may not be eligible for discounts. Pricing subject to change.

¹ **Reliability:** claim based on analysis of independent third party data re nationwide carriers' 4G LTE. LTE is a trademark of ETSI. 4G LTE not available everywhere.

² **Unlimited Talk & Text:** For phones only. Includes unlimited domestic calls & messaging. **Unlimited International Messaging:** Includes unlimited messaging from the U.S., Puerto Rico and the U.S. Virgin Islands to more than 190 countries for text messages and 120 countries for picture & video messages. Messaging capabilities vary by country. AT&T may change countries at its discretion. Visit att.com/text2world (<http://att.com/text2world>) for details. **Messaging:** Messaging applies only to AT&T's Short Messaging Service (SMS) and Multimedia Messaging Service (MMS) and not to any other messaging services or applications. Messages are for direct communication between phones and must originate from your phone. Messages sent to tablets, laptops, or other connected devices are excluded. Messages sent through applications may incur data charges. Service may be terminated or restricted for tethered messaging or misuse.

³ **AT&T Locker:** Requires compatible device (AndroidTM smartphones with OS 2.2+, Android tablets 8" + with 4.0+, iPads[®] and iPhones[®] running iOS 6.0+, smartphones with Windows Phone[®] 8 OS, or a computer with Internet). Service for U.S.-based AT&T subscribers only. Wireless usage may incur data charges. Free storage amounts subject to change or may be discontinued at any time. For full terms, see att.com/wirelesslegal (<http://www.att.com/wirelesslegal>).

⁴ **Wireless Home Phone ("WHP")** is a Commercial Mobile Radio Service and includes unlimited nationwide calling. Provides voice service only, data and messaging excluded. For emergency calls, you may have to provide your address to the 911 operators. WHP device has a backup battery in case of outage. However, landline phone requiring separate electric power connected to WHP device will not place or receive calls (including 911) during power outage. Compatibility limitations apply. For more details go to att.com/getwirelesshomephone (<http://att.com/getwirelesshomephone>).

⁵ **AT&T World Connect Value[™] Package:** Rates are subject to change at any time. \$0.01/minute rate applies to calls to wireless and wireline numbers made to the selected countries identified at att.com/worldconnect (<http://att.com/worldconnect>). AT&T reserves the right to terminate your AT&T World Connect Value Package for excessive usage, and then current international long distance pay-per-use rates will apply to calls you make to those countries. Calls to special services, such as Premium Rated Services, may cost more. Other restrictions and limitations apply. For complete details visit att.com/worldconnect (<http://att.com/worldconnect>).

⁶ Pricing for Value plan with 10GB data includes plan charge (\$100/mo.) and \$15/mo. access charge per smartphone on no annual service contract (AT&T Next, bring your own device, pay full price, or month-to-month). AT&T Next installment charges extra. Also applies to customers with smartphones on 2-yr agreements prior to 2/2/14. When upgrading, buy via AT&T Next or at full price to keep discount. Other charges and restrictions apply.

General Wireless Service Terms: Subject to Wireless Customer Agreement or applicable Business Agreement. Activation fee \$40 per line may apply. Early termination fee up to \$325 may apply. Credit approval required. Geographic, usage, and other terms, conditions, and restrictions apply, and may result in service termination. Coverage and services not avail everywhere. Taxes and other monthly charges apply.

Advertised Speeds Above 3 Mbps

Data as of: 12/31/13

Verizon Communications Inc.

10 - 25 Mbps

»

AT&T Inc.

10 - 25 Mbps

»

Myakka Communications, Inc.

6 - 10 Mbps

Verizon Wired – Verizon only offers DSL at a maximum of 3/1 mbps (Exhibit A). We understand the committee was allowing 3/1 mbps with the assumption that the provider could deliver 4/1mbps service. Verizon plainly only offers the 3/1 mbps and per our test results, they do not even deliver those speeds. Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 4/1 speed requirement.

Verizon Wireless LTE Home Service – Verizon claims its LTE home service is available in this area. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 30GB package (Exhibit B). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 100GB requirement.

AT&T Wireless – AT&T claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 50GB package (Exhibit C). Therefore, we claim Verizon Wireless does NOT meet the requirements to declare this census block served as per the 100GB requirement.

Myakka Communications Wireless – Myakka Communications does not do any wireless service, please see our 477 filings to confirm this. Myakka Technologies does offer wireless service. We are currently working with our state mapping representatives to correct the errors on the next update. Myakka Technologies does not offer packages over 25GB and does not offer phone service. Therefore, we claim Myakka

Technologies does NOT meet the requirements to declare this census block served as per the 100GB requirement and the voice requirement.

In conclusion, based on the above analysis, we ask the commission to reclassify census block 121150027131044 from served to unserved and make it available for CAF II and the Rural Broadband Experiment programs.

Comcast Wired – Comcast does NOT have any facilities in this census block. Please see Exhibit A for the results of the address search. Therefore, we claim Comcast does NOT meet any of the requirements to declare this census block served.

Verizon Wired – Verizon only offers DSL at a maximum of 3/1 mbps (Exhibit B). We understand the committee was allowing 3/1 mbps with the assumption that the provider could deliver 4/1mbps service. Verizon plainly only offers the 3/1 mbps and per our test results, they do not even deliver those speeds. Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 4/1 speed requirement.

Verizon Wireless LTE Home Service – Verizon claims its LTE home service is available in this area. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 30GB package (Exhibit C). Therefore, we claim Verizon does NOT meet the requirements to declare this census block served as per the 100GB requirement.

AT&T Wireless – AT&T claims to service this area via cellular service. We were unable to find any subscribers to their service to run speed test for our analysis. However, the maximum usage per month available per their website is a 50GB package (Exhibit D). Therefore, we claim Verizon Wireless does NOT meet the requirements to declare this census block served as per the 100GB requirement.

In conclusion, based on the above analysis, we ask the commission to reclassify census block 121150027133018 from served to unserved and make it available for CAF II and the Rural Broadband Experiment programs.

Messages sent through applications may incur data charges. Service may be terminated or restricted for tethered messaging or misuse.

³ **AT&T Locker:** Requires compatible device (AndroidTM smartphones with OS 2.2+, Android tablets 8" + with 4.0+, iPads[®] and iPhones[®] running iOS 6.0+, smartphones with Windows Phone[®] 8 OS, or a computer with Internet). Service for U.S.-based AT&T subscribers only. Wireless usage may incur data charges. Free storage amounts subject to change or may be discontinued at any time. For full terms, see att.com/wirelesslegal (<http://www.att.com/wirelesslegal>).

⁴ **Wireless Home Phone ("WHP")** is a Commercial Mobile Radio Service and includes unlimited nationwide calling. Provides voice service only, data and messaging excluded. For emergency calls, you may have to provide your address to the 911 operators. WHP device has a backup battery in case of outage. However, landline phone requiring separate electric power connected to WHP device will not place or receive calls (including 911) during power outage. Compatibility limitations apply. For more details go to att.com/getwirelesshomephone (<http://att.com/getwirelesshomephone>).

⁵ **AT&T World Connect Value[™] Package:** Rates are subject to change at any time. \$0.01/minute rate applies to calls to wireless and wireline numbers made to the selected countries identified at att.com/worldconnect (<http://att.com/worldconnect>). AT&T reserves the right to terminate your AT&T World Connect Value Package for excessive usage, and then current international long distance pay-per-use rates will apply to calls you make to those countries. Calls to special services, such as Premium Rated Services, may cost more. Other restrictions and limitations apply. For complete details visit att.com/worldconnect (<http://att.com/worldconnect>).

⁶ Pricing for Value plan with 10GB data includes plan charge (\$100/mo.) and \$15/mo. access charge per smartphone on no annual service contract (AT&T Next, bring your own device, pay full price, or month-to-month). AT&T Next installment charges extra. Also applies to customers with smartphones on 2-yr agreements prior to 2/2/14. When upgrading, buy via AT&T Next or at full price to keep discount. Other charges and restrictions apply.

General Wireless Service Terms: Subject to Wireless Customer Agreement or applicable Business Agreement. Activation fee \$40 per line may apply. Early termination fee up to \$325 may apply. Credit approval required. Geographic, usage, and other terms, conditions, and restrictions apply, and may result in service termination. Coverage and services not avail everywhere. Taxes and other monthly charges apply.
